**Year : 2**

# **Project Title**

**Opening bakes by applying design thinking**

## **Template Name**

### **Mind Map**

# **Problem Statement**

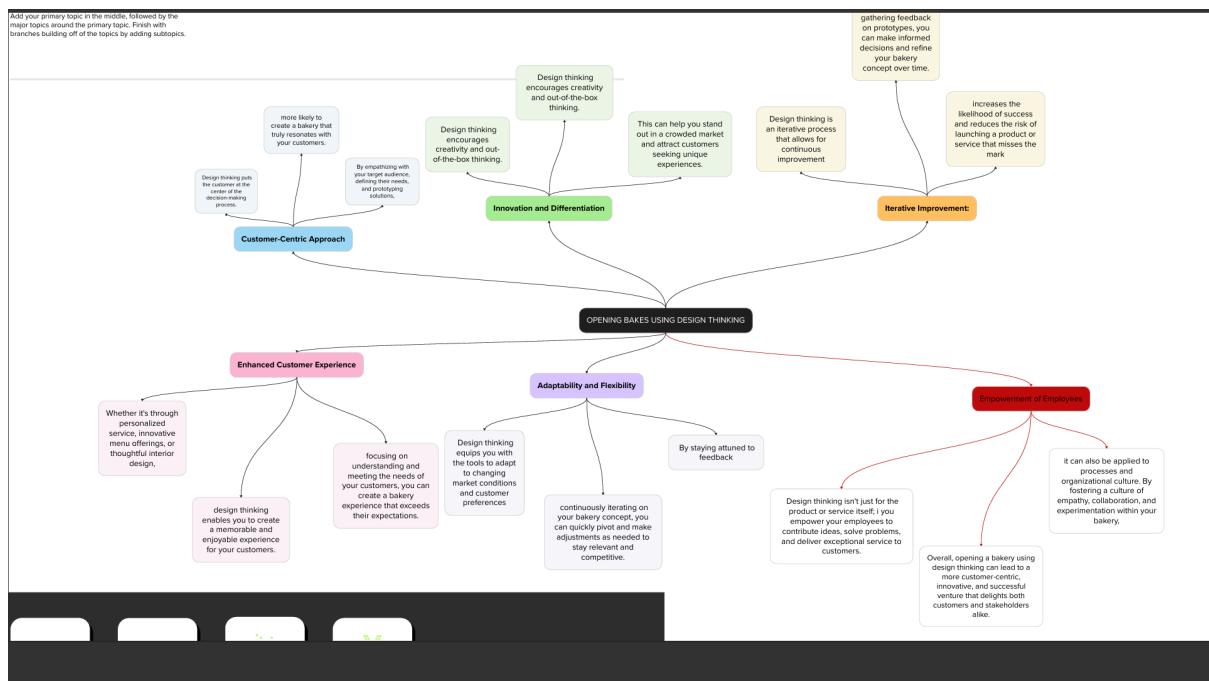

**Try experimenting with flavors and textures, creating your unique twist on classic recipes. getting new methods on baking and adding more creative techniques to attract customers**

## **Project description**

**Opening Bakes is a bakery venture rooted in a passion for crafting delectable treats and fostering meaningful connections through food. Our mission is to delight customers with an array of freshly baked goods, from artisanal bread to indulgent pastries, all made with the finest ingredients and a sprinkle of creativity. At Bakes, we believe in the magic of shared moments over a cup of coffee and a warm croissant, where every bite tells a story.**

# Worked Template with explanation

**In the template all the possible ways and ideas which should be followed for the success of the bakes such as customer centric approach, innovation, customer centric approach etc...**
